Janet P. Kotra

Janet Kotra earned a Ph.D. in nuclear and environmental chemistry in 1983. She has worked at the Nuclear Regulatory Commission for 24 years. After working as a postdoctoral fellow for the NRC’s Advisory Committee on Reactor Safeguards, and as a technical assistant for two NRC Commissioners, she joined NRC’s Division of Waste Management in 1993. Dr. Kotra has contributed to the development of NRC’s regulations for the proposed repository at Yucca Mountain. She currently serves as a senior project manager for high-level waste regulatory communication in the Division of High-level Waste Regulatory Safety. She welcomes the opportunity to discuss NRC’s role as an independent regulator and to describe NRC’s process for deciding whether or not to authorize construction of a proposed repository at Yucca Mountain, Nevada.
