

From the Editors

We are pleased to share Volume 1, Issue 2 of the *Journal of Research in Technical Careers* (JRTC) with you. The manuscripts contained herein are the result of the excellent work of the authors, reviewers, and editors combined. This issue includes five articles from authors with varying years of experience in academia and in public schools. The diversity of articles in this issue is a source of joy for us. Articles include case studies, content analysis, and large quantitative data sets.

Again, we would like to thank the reviewers who dedicated time from their busy schedules to provide excellent feedback to guide authors' revisions. Finally, we encourage you to continue to consider the *Journal of Research in Technical Careers* as an outlet for your academic work. We welcome any suggestions for future issues of JRTC.

Best wishes for 2018.
