ASSISTING SCHOOL TEACHER VETERANS TRIBUTE CAREER & TECHNICAL ACADEMY

Social Issue

- High schools in the US are not educating student the correct way in which they can first learn to succeed in high school, and they are not preparing and motivating students with there education system to go on to college.

Why I did my service

- The education system locally lacks classes that prepare students for higher education and there is very little effort in motivating student to go to college.
- I wanted to inform students about how it actually is in college
- Veterans is the school I came I wanted to work with students that have the same education

Bryan De La Cruz

Nevada Las Vegas*

Service Learning Experience

- The way I served my community is by coming back to the high school I attended and help my former AP biology teacher
- I answered questions on the subject at hand helping with lectures and answering any questions students had about how it is in college and if what they are learning is useful.
- The interactions with student at first was difficult and there wasn't many students that would ask for help, some because they were too shy to ask and some because they understood the subject well.
- Repetition became key students got more comfortable with me being in there class if they didn't understand something they would ask question

What I Learned

- Students at magnet schools have an advantage over students that attended normal highs
- Students that decided to go to a magnets school are far more serious when it comes to educations
- Smaller class help provided more one on one situations with teachers

- Magent schools focus more on career building and motivating students to pursue college degrees.
