Energy Panel Discussion Scheduled for April 16

UNLV’s Institute for Security Studies (ISS) will host a panel discussion April 16 on America’s long-term access to global energy supplies in the midst of global conflict. The discussion, titled “Minimizing the Impact of Conflict on U.S. Energy Security,” will feature a panel of regional and national energy policy and political experts, including:

- Tyrus W. Cobbs, CEO of the Northern Nevada Network
- Ted Robert Gurr, distinguished professor emeritus at the University of Maryland, College Park
- Dennis Pirages, Dean’s Professor of Government, department of political science, UNLV

The event, which is free and open to the public, will take place 6-8 p.m. at the Atomic Testing Museum, 755 E. Flamingo Road.

More info: Contact Nancy Brune, ISS director of research and outreach, at 939-4659 or at nancy.brune@unlv.edu or go to iss.unlv.edu.

$89 Million and Counting

Unlv Officials Strive Diligently to Save Money

By Diane Russell | Marketing & PR

Just as families are looking for ways to trim their spending — a scaled-back cable television package here, buying a used car rather than a shiny new one there — UNLV has been searching for ways to reduce its bills. But when UNLV looks for ways to spend less — and Gerry Bomotti is in charge of the hunt — we’re talking millions saved.

In the last few years, UNLV has slashed its spending by $89 million. Some of it was particularly painful, as when a number of employees didn’t have their contracts renewed, but some of it was done with little or no negative impact to the campus community, particularly in the area of facilities.

Proud of Award

Bomotti, senior vice president of finance and business, takes particular pride in the facilities management department’s recent award from the Nevada Taxpayer Association. The Cashman Good Government Award is the group’s highest honor and is given for

Efficiency Efforts Save Dollars as Research Funding Fluctuates

By Shane Breveil | Marketing & PR

With all eyes on Washington lately, most people know of Harry Reid. Oliver Hemmers wants to make sure the campus is just as familiar with what goes on inside the UNLV building named after the Senate majority leader.

Hemmers took over as executive director of the Harry Reid Center for Environmental Studies in November and immediately changed the center’s focus. The result has been greater efficiency and the ability to retain staff as research dollars fluctuate. Last fall, funding for some of the center’s divisions had dried up, and 12 people were in jeopardy of losing their jobs. Hemmers reconceptualized the center in a way that made it possible to avoid layoffs.

Nearly all of the center’s funding comes from federal grants, particularly from the Department of Energy (DOE), U.S. Forest Service, and the National Park Service. The center houses labs for its researchers as well as professors from across campus. Its radiochemistry program is one of the best in the nation, with graduate students coming from Berkeley, MIT, Virginia Tech, and Michigan State. Last year, the program conducted more than $3 million in

Get a burning question? We’ve got an answer. Each month, Inside UNLV will answer a question of interest to the general campus community. Submit your question to inside@unlv.edu.

More info: Go to facultystaff.unlv.edu/unlvtoday for UNLV Today submission guidelines and instructions. To send a UNLV Official message, contact your vice president or dean’s office.

What is “UNLV Official” e-mail and who controls it?

UNLV Official e-mail is reserved for messages that are so important every member of the campus community should read them. That’s why you can’t opt out of receiving them. Routine announcements should be submitted to UNLV Today, a daily digest you can opt in and out of at any time.

The responsibility for selecting and sending out UNLV Official e-mails rests with the campus’s vice presidents and deans. Each VP or dean — or a designee — decides which messages merit “UNLV Official” status.

UNLV Today messages are submitted by people across campus. The office of marketing & public relations then reviews the messages to ensure they follow general content guidelines.

See CENTER, Page 2

Reid Center Reorganizes

Oliver Hemmers

Hemmers is the executive director of the Harry Reid Center for Environmental Studies as well as the director of the office of strategic energy programs. He received his Ph.D. in physics from the Technical University of Berlin, Germany, and has been at UNLV since 1994.

Over the past 10 years, Hemmers has been directly involved on research projects totaling more than $6 million. He currently manages a multi-year, multi-million dollar biodiesel project funded by the U.S. Department of Energy.

Write Now!

If you’ve been planning to write your legislators concerning the higher education funding crisis, you’d better get to it. Important decisions are about to be made. To find out who represents you in Carson City, go to unlvtoday.unlv.edu/budget.
Today’s Actions Will Provide Long-Term Benefits

Activities in the Nevada Legislature continue to be at the forefront of campus concerns. The uncertainty tied to the budgeting process has made it difficult to provide the concrete information we all desire. We have used the budget website, town halls, and this column to share what we do know. I hope that soon we will have more definitive information on UNLV’s budget.

Regardless of the final numbers, however, I do believe that UNLV will be a stronger university after this crisis.

We will have a framework for building upon our strengths. We currently have 364 positions vacant, including more than 90 faculty positions. This gives us flexibility, I believe, to respond to the changes in state revenue. Short term, this has resulted in increasing workloads and class sizes — things that are not beneficial. Long term, however, I believe we will be positioned to build and strength key areas. As our economy recovers and we secure additional resources, our strategic plan will guide our growth.

We will have formed new partnerships. The current budget situation has forced us out of the status quo. On the academic side, for example, we recently introduced our first joint Ph.D.

program with UNR (in public health); I do not believe such a partnership would have been embraced as strongly if both universities were flush with funding.

Educational outreach has been very entrepreneurial in expanding online course offerings and working with local businesses to develop much-needed training programs. (As an aside, the division has been very helpful in creating opportunities for the part-time instructors who were cut from the state budget.)

In the future, you will also see more public-private partnerships when we build facilities. More than ever, we recognize the benefits of forming such partnerships.

We will have stronger advocates for higher education. The crisis heightened the awareness of alumni, legislators, donors, business leaders, and the campus community about higher education’s pivotal role in strengthening Southern Nevada. I am proud to say that K-12 and higher education are strong allies, and the interdependency and mutual necessity of both is now a part of the discussions about the future prosperity of the state. The crisis also created lifelong advocates for UNLV within our own student body; I have been very impressed by the way students have engaged in the budget debate.

We will address funding inequities. Education has been a victim as long as anyone can remember to the swings of the economy. One of our primary legislative goals is to get approval for a study of the state’s higher education funding. In addition to funding stability, the study would address inequities among the state’s public institutions as well as the disparity between our funding and our mission. I believe the crisis has created resolve within our leaders to act on these tough issues and to place education at the top of the state’s priority list.

More info: For more budget information, including a recently updated FAQ section, go to unlv.edu/budget.

David Ashley | UNLV President

5 Minutes with President Ashley

> CENTER
Continued from Page 1

The Marjorie Barrick Museum

So, Hemmers eliminated the division. On the academic side, for example, we recently introduced our first joint Ph.D.

"The (Harry Reid Center) is now operating far more efficiently in terms of personnel and budget," said Ron Smith, vice president for research and graduate studies.

Providing Assistance

Hemmers’s next goal is to involve more UNLV faculty members in the center as principal investigators. Some projects can get too large for individual academic departments, and the center can provide additional administrative support and infrastructure, he said. This is where the Harry Reid Center comes in — helping with purchases and contracts, interacting with the office of sponsored programs, and providing research space.

This is especially true for projects that involve multiple colleges. For example, a biosolids algar proposal that the center recently submitted to the DOE brought together researchers from the colleges of Sciences, Engineering, and Urban Affairs and from the Institute for Security Studies.

"I believe that UNLV would lose key research, whose skills were needed, and sometimes easily transferable, to other research projects, he said.

So, Hemmers eliminated the divisions and reorganized staff around three major program areas:

- Renewable energy
- Radiochemistry and nuclear engineering
- Cultural and environmental sciences.

The Marjorie Barrick Museum of Natural History, a source of sponsored research. The center’s largest research program is the Transmutation Research Program, an ongoing nuclear fuel recycling project that has received approximately $28 million in funding from the DOE since 2001.

The center’s environmental program conducts research related to understanding the environment and its stewardship, focusing on Southern Nevada. Last year the center conducted 23 cultural and environmental research projects with budgets totaling several million dollars.

Working in Silos

Before Hemmers reorganized the center, it was divided into eight silos that left each group vulnerable if funding decreased.

That would mean UNLV would lose key researchers whose skills were needed, and sometimes easily transferable, to other research projects, he said.

So, Hemmers eliminated the divisions and reorganized staff around three major program areas:

- Renewable energy
- Radiochemistry and nuclear engineering
- Cultural and environmental sciences.

The Marjorie Barrick Museum of Natural History, a source of

continued information concerning cultural history of the American Southwest, is part of the cultural and environmental sciences program area.

The change allows researchers to collaborate on multiple projects at the same time.

"The center is now operating far more efficiently in terms of personnel and budget," said Ron Smith, vice president for research and graduate studies. "I believe that UNLV would lose key research, whose skills were needed, and sometimes easily transferable, to other research projects.

The center recently submitted a proposal to the DOE brought together researchers from the colleges of Sciences, Engineering, and Urban Affairs and from the Institute for Security Studies.

"We are already starting to see additional grants come in that we never expected," Smith said.

David Ashley | UNLV President

Invent the Future

By Michelle Mouton | UNLV Foundation

The big gifts may make the headlines, but the little ones add up, too.

Faculty and staff have played an important role in the success of the campaign both by volunteering time and making contributions.

In 2008, more than 220 faculty and staff members contributed to programs, scholarships, and the annual fund.

One goal of the Invent the Future campaign is to involve more individuals, including faculty and staff, in the life of the campus.

Employee giving exceeded $221,500 last year. Throughout the campaign, faculty and staff giving has reached more than $4 million, including gifts designated through estate plans such as wills and trusts.

These contributions are benefiting all areas of the campus, and every gift counts. "A lot of little dollars come together to work in mighty ways," said Kristene Fisher, a donor and executive director of the office of the vice provost for academic affairs. "I know that I’m part of a larger community that makes things happen."

Terrence Clautere, a professor in the department of finance, said employees giving their time and supporting the university through their work is important, but so is giving back when they can. "I just have a desire to give back to the university and the community," he said. "I’ve been fortunate to have a good career in academe, and so it’s a good way to give back."

Little Gifts, Big Future

Recognizing Donors

A recognition social for all faculty and staff donors will take place 2-4 p.m. April 16 at the Metcalff Art Gallery in the Tam Alumni Center.

More info: Contact Patrice Mickens, development officer for annual giving, at ext. 5-2821.

The annual Holiday Card Tree fund primarily is supported by faculty and staff gifts. This program raised $6,425 — a record amount — in 2008 for an endowment that funds multiple student scholarships each year.

Professional development funds for staff also are supported by contributions from faculty and staff and provide numerous opportunities for employees to gain skills and expertise in areas relevant to their careers.

Campus community members also can choose to designate their gift to a program or college, and many of those contributions go a long way to building the foundation for a stronger university.

"We’re grateful for the support of our faculty and staff because it’s important to the quality of the university," said Cristina Kavoori, director of annual giving at the UNLV Foundation. "Their support demonstrates an investment in UNLV and provides a base of giving for others."
the most efficient use of taxpayer money in the state. It was given to the UNLV department for having saved $11 million since 2001 through sustainable practices (see “Taxpayer Group,” this page).

That’s an independent taxpayer’s group not linked to a governmental body verifying that our facilities management department has realized substantial savings for Nevada’s citizens by looking for and implementing ways to be more efficient,” Bomotti said.

Savings Beyond Facilities
While last year’s efforts got some outside recognition, cost-cutting measures are ongoing. “This isn’t something new we are doing just because of the state’s current budget problems,” Bomotti noted. “It’s our job to be good stewards of the taxpayers’ money — in good times and in bad.”

This year, however, extra effort is being made to identify potential efficiencies and cuts, he said. And it’s not just Bomotti’s staff who are looking for ways to save money. All vice presidents and deans have been given target amounts by which they are expected to reduce their budgets.

Facilities maintenance continues to look for ways to increase efficiency in areas such as utility costs.

Sustainability Links
Many of these efforts tie in well with UNLV’s commitment to sustainability, Bomotti pointed out. The “paperless” push that did away with paper payroll checks at the end of 2008 is one example.

Facilities now is testing an automated leave-reporting system and the university is researching an automated travel system. Another improvement in automation will come with the new INtegrate system that UNLV is pilot testing for the NSHE. INtegrate is a modern, automated student information system that will include admissions, advising, registration, and all student support activities through graduation.

Legislative Watch
Right now, of course, Bomotti and his staff are among the folks on campus who are spending a good part of their time working on issues involving the Legislature.

“We’re working with legislators, providing them facts and figures they need as they work with the state budget,” he said.

Bomotti said the hope is that lawmakers will recognize UNLV’s vigilance in pursuing cost savings and will fund the university sufficiently to maintain its mission.

“Sometime early this month, we hope to know more about the Legislature’s budget plans for all state agencies,” he said.
Academic Success Center Workshops Target Students Struggling Academically

Faculty and staff members are asked to encourage students — especially those on probation or in academic peril — to sign up for an April 22 workshop to help students understand and improve their grade point averages.

The center received positive responses from students who participated in workshops earlier this semester.

Starting fall semester, these workshops will be required for students with undeclared majors who are on probation, and will be offered to colleges for their students on probation.

More info: Contact Anne Hein at ext. 5-0663.

Life Skills Skills Help Athletes Improve Decision Making

A series of skits depicting life skills issues was presented to UNLV’s student-athletes and to members of the athletic staff in February thanks to the collaborative effort of the student-athlete academic services (SAAS) department, theatre department, and the College of Fine Arts Advising Center.

The CHAMPS/Life Skills Theatre featured undergraduate actors from the theatre department playing the roles of student-athletes involved in more than 30 life skills issues.

Audience members interacted with the performers to choose the endings of the skits, while campus resource experts led discussions about consequences of the actions depicted.

Theatre professor Rayme Cornell recruited the actors, while Aaron Tuttle from the Fine Arts Advising Center organized the event with SAAS.

A Target Campus Grant made the event possible. Also supporting the event were the Jean Nidetch Women’s Center, the Rebel Wellness Zone, counseling and psychological services, the NACCA compliance office, the office of student conduct, and the campus police department.

Business

Messier Named Outstanding Auditing Educator

Professor William F. Messier has been named 2009 Outstanding Auditing Educator by the auditing section of the American Accounting Association.

Messier, who holds the Kenneth and Tracy Knauss Endowed Chair in Accounting, was recognized for his exemplary research and teaching over more than a decade, as evidenced by publications, educational innovations, guidance to graduate and undergraduate students, and excellence in teaching.

He also holds the Fricewaterhouse Coopers Professor II in the department of accounting, auditing and law at the Norwegian School of Economics and Business Administration and has held a visiting appointment at SDA Bocconi in Italy. He received his doctorate from Indiana University in 1979 and began as an assistant professor at the University of Florida. Before coming to UNLV, he was a faculty member at Georgia State University.

Messier is a past editor of Auditing: A Journal of Practice & Theory. He also served as president of the auditing section of the American Accounting Association.

More info: Contact Anne Hein at ext. 5-0663.

Print to Screen

Award-winning novelist Russell Banks, left, and writer and actress Guinevere Turner trade comments during a Black Mountain Institute at UNLV event last month. The topic was the challenges of adapting books for the big screen. The institute presents distinguished speakers and writers who specialize in literature, politics, social issues, and international affairs.

Memorial Clinic Helps Veterans Get Free Dental Care

A dental clinic honoring a U.S. Army soldier who died in Iraq is helping Nevada’s veterans receive dental care.

For people who do not qualify for Medicaid and cannot afford dental insurance, the Sergeant Clint Ferrin Memorial Clinic has been held twice at the dental school. So far, 53 veterans have received more than $21,000 in treatment.

Sgt. Clint Ferrin, a member of the 82nd Airborne Division, died in 2004. His brother, UNLV dental student John Ferrin, a second lieutenant in the National Guard, saw a need to provide dental care to Nevada Army National Guard soldiers who were not eligible for deployment because of dental disease. The clinic, which began in July for soldiers of the Nevada Army National Guard, since has been expanded to treat all veterans.

Education

School Psychology Degree Receives Stamp of Approval

The department of educational psychology recently received word that its Ed.S. degree in school psychology has again been granted full approval by the Program Approval Board of the National Association of School Psychologists (NASP).

This is the highest level of national recognition available for specialist-level school psychology programs. The Ed.S. degree is the entry-level degree for practice as a school psychologist, involving one year of post-master’s graduate coursework and a full academic year internship.

NASP describes its program approval/national recognition as an important indicator of quality graduate education, with comprehensive content and extensive and properly supervised field experiences, as of useful n-type molecules and challenges in controlling nanostructure morphologies.

The grant includes an educational outreach component. Lee plans to partner with the Clark County School District to provide summer internships in his lab for Basic High School students and to launch a summer research program for high school science teachers. He also will recruit, train, and mentor several graduate and undergraduate students from the College of Sciences.

“Dong-Chan’s outstanding research program offers the promise of more efficient energy use for Nevada and the nation,” said Wanda Taylor, interim dean of Sciences. “UNLV students are fortunate to find such an accomplished and dedicated scientist in their classroom.”

Lee joins professors Brian Hedlund and Frank Van Breukelen from the School of Life Sciences and Chulsung Bae from the chemistry department as the fourth CAREER Award recipient at UNLV in as many years.
judged by trained national reviewers. Graduates from approved programs are automatically eligible to apply for the National Certificate in School Psychology.

Engineering

Students Compete in Programming Challenge

The student chapter of the Association for Computing Machinery (ACM), coached by faculty member Lawrence Larmore, competed in the ACM regional Programming Competition, narrowly missing a chance to advance to the national competition.

Members of 53 teams from across the country competed in solving seven programming problems in five hours. Teams were not allowed to use electronic devices or cell phones to arrive at their solutions. However, they were allowed one computer per team to assist them. Scoring was based on how many problems each team completed and how much time they used.

Members of the team, called the Reapifiers, were Talin Salway, Sean Kau, and Scott Miller. All three plan to compete in next year’s challenge.

Fine Arts

Composers Come to Campus

The music department will host NEON, Nevada Encounters of New Music, April 7-12. The composers’ symposium and festival, now in its third year, offers four days of intensive activities, including concerts, lectures, private lessons, and master classes. This program combines active learning with enriching exposure to new music.

Enchanted Evenings in April

The Performing Arts Center (PAC) welcomes Roman Viazovskiy as part of the Classical Guitar Series on April 23. Viazovskiy released his second CD in 2007 and debuted it at the Moscow Philharmonic’s Tchaikovsky Concert Hall.

On April 25, the PAC presents Neil Berg’s “100 Years of Broadway.” Like speed dating for Broadway lovers, this musical revue takes the audience through a century of Broadway in just one evening. The program includes “Some Enchanted Evening” (South Pacific), “Think of Me” (Phantom of the Opera), and “All That Jazz” (Chicago).

For ticket information, call ext. 5-2787.

Graduate

New Degree Programs, Certificates Approved

During the past year, two new degree programs and several graduate certificate programs have been approved. These include:

• Ph.D. in environmental and occupational health
• Master of science degree in oral biology from the School of Dental Medicine
• Graduate certificate in accounting
• Graduate certificate in community mental health offered by the department of counselor education
• Graduate certificate in management information systems

• Graduate certificate in finance
• Business administration graduate certificate in management
• Business administration certificate in new venture management
• Advanced specialty program certificate in pediatric dentistry.

Honors

Students to Host Jane Austen Ball

Jane Austen’s resurgence in popularity is not limited to the worlds of literature and film, but has extended to the Honors College as well. The college’s 400-level seminar on Austen will culminate with a Jane Austen Ball on May 8.

Professor Maria Jerinic said the students, who read six of Austen’s works as part of the seminar, were enthusiastic about learning in depth about both the author and her books.

“Our Jane Austen seminar meant the world to me,” said student Mary Catania. “Dr. Jerinic combined a passion for the material with an incredible degree of scholarly expertise. In doing so, she allowed all of us to keenly express our love and admiration for Austen and at the same time exposed us to her depth and continued relevance.”

For current and past Honors seminar listings, go to honors.unlv.edu.

Faculty, Students Present at Regional Conference

College staff recently attended the annual Western Regional Honors Council (WRHC) in Spokane, Wash.

The conference, which focused on preservation, sustainability, and renewal from both environmental and academic standpoint, was hosted by Washington State University at the historic Davenport Hotel.

Presentations by students and faculty focused on what honors colleges and programs could do to help students and institutions “go green.”

UNLV’s Honors College is a member of the WHRC and the National Collegiate Honors Council.

Law

Students Study Employment Discrimination

Students and professors at the Boyd School of Law are concerned with legal doctrine as well as with “law on the ground,” the practical, real-world effects of legal rules and decisions.

An example is a class co-taught recently by Boyd professor Ann McGinley and professor Mitu Gulati of Duke University School of Law on “Employment Discrimination: Dress and Appearance Regulation in the Casino Industry.”

A 2006 federal court decision involved a suit by a female bartender who alleged that her Nevada casino employer committed illegal sex discrimination when it fired her for refusing to adhere to the casino’s appearance policy by wearing make-up. Although the court ruled against the bartender, it stated that appearance policies can be illegal under certain circumstances if they impose unequal burdens on men and women or impossibly sex-stereotyped female employees. It was widely predicted that the decision would lead to changes in casino appearance policies and staffing patterns.

The professors and their students are testing these predictions. Under the professors’ direction, the law students visited casinos, interviewed casino workers, and talked with attorneys and casino executives. Students then wrote papers.

Across Campus

Here Comes the Sun

The Amonix 7700 is a new photovoltaic system at the Center for Energy Research, the world’s largest and most powerful solar generator, according to the company. Professor Bob Boehm, the center’s director, said the photovoltaic system is capable of converting as much as a quarter of incoming sunlight for power generation. The center will be studying the Amonix 7700 to test its reliability, accuracy of aim, and temperatures generated.
Spotlight On Accomplishments

Submit Your News
E-mail entries to inside@unlv.edu. Items should not be more than 100 words.

> Diane Sessions (Student Accounts) was named a classiﬁed employee of the month in the administra- tive category for February 2009. She worked part time at UNLV during registration for about nine years before joining the staff full time in 1996. Among her duties is billing third parties for tuition payments. (An example would be a company that is paying for an employee to attend UNLV.) She also works closely with several departments handling employee grants-in-aid.

> Tiffany Schmier (Honors) presented “Great Expectations: Meeting the Needs of Today’s Honors Student” at the National Academic Advising Association’s region 9 conference at the Tropicana Hotel. Lisa Chastain (Honors) created the presentation, which was selected as Best in State at the Nevada State Academic Advising Drive-In Conference last year. It high- lighted the cross-campus and inter- campus communications between the college uses to best serve its students.

> William Sullivan and Keith Rogers (CAES) presented “U.S. Region Titus, who is on leave from her job as a UNLV political science professor, with the prestigious Educational Pioneer Award during the 2009 National TRIO Day. GEAR UP Day celebration at the Rio Hotel in February. The center annu- ally recognizes individuals for their participation in community efforts and for going “above and beyond” to sup- port higher education for low-income and ﬁrst-generation students. Also rec- ognized for their academic and per- sonal achievements were 13 outstand- ing TRIO and GEAR UP honorees, both current program participants and alumni.

> Erika Engstrom (Communication Studies) wrote an article, “Creation of a New ‘Empowered’ Female Identity in WEh’s Bridesmaids,” which appears in the winter 2009 issue of Media Report to Women.

> Tom Sommer (Libraries) has been invited to address the 2009 joint annual meeting of the Council of State Archivists and the Society of American Archivists in August. Sustaining archives has become more important in recent years because of the chang- ing expectations of local and global audiences. His paper is entitled “UNLV Special Collections: Expanding Our Reach and Use of Digital Libra- ries.” It will focus on the history of Web 2.0 and how the UNLV Special Collections Division is addressing the current needs of researchers via digital manage- ment software, search boxes, blogs, and virtual exhibits.

> DeeDee Roberts (Registrar) was named a classiﬁed employee of the month in the administrative cate- gory for February. An admissions and records assistant III, she has worked at UNLV since 2006.

> Glenn Casale (Theatre) recently received the Board of Regents’ Award for Creative Activity. This award, which was established in 1993, recog- nizes signiﬁcant accomplishments that bring recognition, as well as national and international stature, to the Nevada System of Higher Education. The recipient receives a $5,000 stipend and a medal.

> Dave Loeb (Music) served as guest conductor of the Long Beach Symphony Orchestra in February. The pro- gram included the world premiere of Raymond Bacon’s “Kazan Overture” and a medley of music from the ﬁlm Kazan. The program also featured new works by John R. Zavod and John Corigliano.

> Erika Engstrom (Communication Studies) wrote an article, “Creation of a New ‘Empowered’ Female Identity in WEh’s Bridesmaids,” which appears in the winter 2009 issue of Media Report to Women.

> Louis Kavouras (Libraries) has written a book, _The Aesthetics of Dance_, which has been accepted for publication by _Human Kinetic Kinetics_. The book is _philosophical investigation for how to look at a dance work and understand it as a work of art._

> Larry Leterouanne (CAES) was selected by the U.S. Department of Education to serve on a negotiated rule- making committee charged with writing new regulations to implement the Higher Education Opportunity Act. The act, which became law in August, is the most current reauthorization of the Higher Education Act of 1965. He is one of 18 members of the Discretionary Grants Committee. That committee is focus- ing on the regulations that govern TRIO, GEAR UP, and other discretionary grant programs. UNLV is one of 13 TRIO proj- ects and two GEAR UP partnerships.

> Bill Halley (Student Recreation and Wellness) was named classiﬁed employee of the month in the custodial category for February. He has worked at UNLV since 2008.

> Chad Hensley (Radiography) has been named as president of the Association of Collegiate Educators in Radiologic Technology. He will hold that position for two years and then will become chairperson of the board. The cer- emony took place at the group’s confer- ence in Las Vegas in February.

> Karl Kingsley (School of Dental Medicine) is co-author of the article, “A Case Study for Teaching Information Literacy Skills,” which was published in January by the journal _Medical Education_ as a collaborative effort with the University of New Mexico.

> Vicky Albert (Social Work) has written two articles that were published recently. One, titled “Citizenship Status, Poverty, and Government Transfers for Families with Children,” was the lead article in the _Journal for Social Service Research_. The second, titled “Refusing Child Maltreatment: Family’s Response to Social Work’s Intervention on Public Policy: Child Neglect and Exploitation — Immorality on a World Scale,” was published in the _Journal for Social Service Research_.

> Alo Faleﬁne (Accounts Payable) was named classiﬁed employee of the month in the technical/service category for February. A former technical services technician, he spends all of his work time on travel expense reim- bursements for employees. He earned a bachelor of science degree in ﬁnance from UNLV and has worked at the university almost three years.

> Lisa Chastain (Honors) was part of a consortium of faculty and staff mem- bers from various colleges who traveled to Italy to complete Universities Studies Abroad Consortium site assessment of Torino and Viterbo, Italy. The faculty and staff who attended from universi- ties across the United States were given an opportunity to interact with local faculty and staff and attend presenta- tions, as well as learn more about Italian academic practices.

The goal of the visit was for participants to become a resource for students who wish to study abroad.

> Deanna Davis and Kyle Ethelbah (CAES) presented numerous work- shops during the UNLV National TRIO Training Institute conference at the Riviera Hotel in January. Davis presented “Coordinating Services Offered by TRIO and Other Programs,” “Differentiating Allowable from Non-Allowable Costs,” “Conducting Project Evaluation, Part I,” “Collecting Data Needed for Evaluation & Performance Reporting,” “Analyzing Data Needed for Evaluation & Performance Reporting,” Ethelbah presented “Presenting Data Needed for Evaluation & Performance Reporting,” and “Performance Reporting, Part II.” The seminars focused on the laws, program regulations, and general administra- tive regulations to which TRIO project grantees must conform, as well as infor- mation on managing TRIO budgets in accordance with federal requirements.

detailing the results of their research, comment- ing on their ongoing responses to the 2006 deci- sions, and analyzing the prospects for future litter- ature. The results of this “on the ground” legal research will be described in published work.

More info: Go to law.unlv.edu/faculty/ann- mcglinchy.html.

> Tom Sommer (Libraries) has been invited to address the 2009 joint annual meeting of the Council of State Archivists and the Society of American Archivists in August. Sustaining archives has become more important in recent years because of the changing expectations of local and global audiences. His paper is entitled “UNLV Special Collections: Expanding Our Reach and Use of Digital Libraries” and it will focus on the history of Web 2.0 and how the UNLV Special Collections Division is addressing the current needs of researchers via digital management software, search boxes, blogs, and virtual exhibits.

> Dave Loeb (Music) served as guest conductor of the Long Beach Symphony Orchestra in February. The program included the world premiere of Raymond Bacon’s “Kazan Overture” and a medley of music from the film Kazan. The program also featured new works by John R. Zavod and John Corigliano.

> Erika Engstrom (Communication Studies) wrote an article, “Creation of a New ‘Empowered’ Female Identity in WEh’s Bridesmaids,” which appears in the winter 2009 issue of Media Report to Women.

> Chad Hensley (Radiography) has been named as president of the Association of Collegiate Educators in Radiologic Technology. He will hold that position for two years and then will become chairperson of the board. The ceremony took place at the group’s conference in Las Vegas in February.

> Karl Kingsley (School of Dental Medicine) is co-author of the article, “A Case Study for Teaching Information Literacy Skills,” which was published in January by the journal _Medical Education_ as a collaborative effort with the University of New Mexico.

> Vicky Albert (Social Work) has written two articles that were published recently. One, titled “Citizenship Status, Poverty, and Government Transfers for Families with Children,” was the lead article in the _Journal for Social Service Research_. The second, titled “Refusing Child Maltreatment: Family’s Response to Social Work’s Intervention on Public Policy: Child Neglect and Exploitation — Immorality on a World Scale,” was published in the _Journal for Social Service Research_.

> Alo Faleﬁne (Accounts Payable) was named classiﬁed employee of the month in the technical/service category for February. A former technical services technician, he spends all of his work time on travel expense reimbursements for employees. He earned a bachelor of science degree in ﬁnance from UNLV and has worked at the university almost three years.

> Lisa Chastain (Honors) was part of a consortium of faculty and staff members from various colleges who traveled to Italy to complete Universities Studies Abroad Consortium site assessment of Torino and Viterbo, Italy. The faculty and staff who attended from universities across the United States were given an opportunity to interact with local faculty and staff and attend presentations, as well as learn more about Italian academic practices.

The goal of the visit was for participants to become a resource for students who wish to study abroad.

> Deanna Davis and Kyle Ethelbah (CAES) presented numerous workshops during the UNLV National TRIO Training Institute conference at the Riviera Hotel in January. Davis presented “Coordinating Services Offered by TRIO and Other Programs,” “Differentiating Allowable from Non-Allowable Costs,” “Conducting Project Evaluation, Part I,” “Collecting Data Needed for Evaluation & Performance Reporting,” “Analyzing Data Needed for Evaluation & Performance Reporting,” Ethelbah presented “Presenting Data Needed for Evaluation & Performance Reporting,” and “Performance Reporting, Part II.” The seminars focused on the laws, program regulations, and general administrative regulations to which TRIO project grantees must conform, as well as information on managing TRIO budgets in accordance with federal requirements.

Another Take
Stories by Diane Russell | Marketing & PR

Each month, randomly selected UNLV employees will be profiled in Another Take, a section that lets you see another side of your colleagues.

David Henry
Professor of Communication Studies
Rebel since: 1998
What brought you to UNLV? I came to be the director of the Hank Greenspun School of Communication, which at that time included both my department of communication studies now and what is now the Hank Greenspun School of Journalism and Media Studies.

What about the reorganization? It’s been good for both groups. For our part, we have developed a program defined around two areas, interpersonal communication and public discourse. Increasingly, our graduates go on to pursue doctoral degrees. Also, as both the university and our program grow stronger, we’re seeing increased rigor in what we expect from our students and what they expect from us in return.

Are you enjoying teaching full time again? Yes, because I enjoy working closely with students. I’m especially enjoying teaching in the Honors College. Because of the smaller class sizes, I’m able to write as much back to them as they write to me in their essays and papers. It allows you to teach them the way students should be taught.

Since you study presidential rhetoric, talk about the top orators: Among the presidents of the 20th and early 21st centuries, three stand out — Franklin Roosevelt, Ronald Reagan, and Barack Obama. Kennedy would certainly have joined that group if he had lived longer. Clinton was very good, too. It may be too soon to put Obama in the top three, but the potential is evident.

What makes Obama so good? He is smart, he reads a lot, he thinks before he speaks, and when he does speak, he has something to say. During the campaign when people were taking shots at him, he stayed focused on his message and what he wanted the voters to think about. He didn’t let other people determine the focus of the day.

Why do so many people view him as inspiring? With him you get the sense that being elected president wasn’t his ultimate goal. Instead, being elected was a means toward achieving his goals for the county. For some presidents, getting elected seems to be an end in itself.

Phyllis Thompson
Administrative Assistant III, College of Liberal Arts
Rebel since: 2000
Typical day: I start off by going through my e-mails and answering any questions. I am the leave-keeper for a college with close to 200 people. I receive many leave-related questions every day. I also consider myself the unofficial events planner for the college. Right now, I’m working on the Honors Convocation. In the fall, I help plan a get-together so that our dean can meet with new faculty and staff members.

Can’t work without: I’m always telling people how much I love my scanner. One change I’ve made is that I scan employees’ leave forms and then send them their copies electronically. I know the university is emphasizing “paperless,” processes and I’m trying to help by saving paper.

People would be surprised to know: My husband and I had a stained glass business back in New Jersey. In 1985 we took a stained glass class just for fun. We started making pieces and selling them at craft shows. It was a fun hobby.

What you did before? For almost 30 years I worked for NYNEX, which was the telephone company for New York and New England. Then I spent three years at Rutgers University. The first time my husband and I came out to Las Vegas we fell in love with the desert and the surrounding mountains. We’re so acclimated now that when the temperature is in the 60s, we’re wearing long pants and sweaters.

Dream vacation: One place my husband and I have always talked about going to is Australia. Since I don’t think we can travel that far, I would love to go to England, Ireland, and Scotland instead.

Dream vacation: One place my husband and I have always talked about going to is Australia. Since I don’t think we can travel that far, I would love to go to England, Ireland, and Scotland instead.

Nancy Cleveland
Artist/Designer, Reprographics and Design Services
Rebel since: 1978
Typical day: There really isn’t one. I design a variety of brochures, catalogs, and programs for a number of campus clients. Sometimes I’ll work on the same project for two weeks if it’s something lengthy and detailed. Other days I rush to turn a project around in a day or two. It just depends which fire leaps the highest.

What makes you good at what do you do? I’m good at paying attention to detail. I tend to do the long, detailed projects like the undergraduate, graduate, and ed outreach catalogs. The commencement program is a major project, and not just because it’s long — usually around 48 pages. It is incredibly detailed and those details are important. Parents don’t spend all that money on college to see their child’s name spelled wrong at graduation.

Can’t work without: The people in this building. We’re like family.

How you came to UNLV: My husband, Wayne, came here on a football scholarship in the ’70s. He played in the opening game at Sam Boyd Stadium. Later, he worked at UNLV in the receiving department. People would be surprised to know: I’m a big Elvis fan. One of these days I’m going to make it to Graceland. Everyone I know who goes there brings me a souvenir.

Last book read: The Shack by William P. Young.

Dream vacation: I’ve had one dream vacation and have another in mind. An aunt took my sister and I on an Alaskan cruise. We had a suite complete with butler service. It was wonderful. The staff was a little appalled that I wanted to do my own laundry. But someone else wash my underwear? No thanks. I’ll do it myself. Now I would like to see the Panama Canal. It’s always fascinated me. Look at the difference it’s made in so many people’s lives.
For the Love of the Game

By Shane Bevell | Marketing & PR

For the love of the game. Yeah, it’s a cliché, but why else would hundreds of student-athletes sacrifice their own money and a lot of time to compete for a club team?

Unlike UNLV’s official athletic teams, sports clubs don’t offer scholarships or support staff to help with logistics, said Steven Thiele, club sports program coordinator. “The teams raise money to keep out-of-pocket costs low, but player dues can run into the thousands of dollars,” he said. The student-athletes do all the work to make their clubs function — deciding team rules and game schedules, organizing jersey purchases and travel accommodations, and developing sponsorship deals and fundraising activities. While not affiliated with the NCAA, club teams compete regionally and nationally against other colleges for national championships.

Student-athletes who did not make the university-sanctioned team can form a club team to compete at a different level (as is the case with baseball and soccer). UNLV club teams include:

- Baseball
- Bowling
- Boxing
- Cycling
- Ice Hockey
- Lacrosse
- Rugby
- Soccer
- Roller hockey
- Table tennis
- Ultimate Frisbee
- Volleyball

More info: Go to unlv.recportal.net/sportsclubs.

(Above) The rugby team scrums for a photo. (Right above) Ryan Krametbauer, left, and Anthony Greener led the hockey team to a ninth place finish in the West Region and its first-ever regional tournament. Meanwhile, another UNLV team, the roller hockey team, placed second in the Western Regional Tournament and will play in the College Roller Hockey National Championships in Pennsylvania this month. (Right) John Priest, left, Jerome Foster, center, and Henry Namaau at the UNLV boxing gym. Priest is a graduate student in exercise physiology who wants to train fighters as a career. Foster, a junior university studies major, is preparing for the upcoming regional tournament. Namaau is an assistant coach and boxed for the team from 2004-06. In 2006, he won an individual championship, helping the boxing club win the National Collegiate Boxing Association title.
