What is AACR2 and what is RDA?

- **AACR2 is the 2nd edition of the Anglo American Cataloging Rules**
- **RDA means Resource Description and Access**

Current status of RDA

The implementation of RDA will begin no earlier than January 1, 2013.

**Why do we need a new
cataloging code?**

**For one thing, the world is
different now than in
1978 when AACR2 came
out**

How is the world different from 1978?

- **Entertainment then**
- **Entertainment now**
- **Communication then**
- **Communication now**
- **Computers**

Why else do we need a new cataloging code?

- **RDA better for cataloging electronic resources**
- **RDA better suited to cataloging media**
- **RDA may be better suited to online catalog**

Other reasons why we need a new cataloging code

- **Better ways to bring together different editions and manifestations of a work.**
- **Basic function of RDA is to identify and relate—help user find, identify, select, and obtain library material**

What does FRBR mean to me as a user?

- I need to know Shakespeare's play Hamlet for an exam.
- ***I need to read this work.***
- I need to read Hamlet, and my mother tongue is Spanish, so I want a Spanish translation of Hamlet.
- ***I need a particular manifestation of a particular expression of the work.***

Work

Manifestation

As a user...

- Our professor put the print 2000 Oxford publication on the reading list.
- ***I need this particular manifestation.***
- I need to find the copy I borrowed because it is overdue.
- ***I need a particular item.***

Expression

A stack of books is visible on the left side of the slide, with a magnifying glass positioned over them. The background is a warm, orange-brown gradient.

**Why else do we need a new
cataloging code?**

**Make bibliographic records
easier to understand**

Specific changes

- **No General Material Designation [GMD]—new 300 fields to give content, media, and carrier:**
 - **Content type. Marc 336**
 - **Media type. Marc 337**
 - **Carrier type. Marc 338**

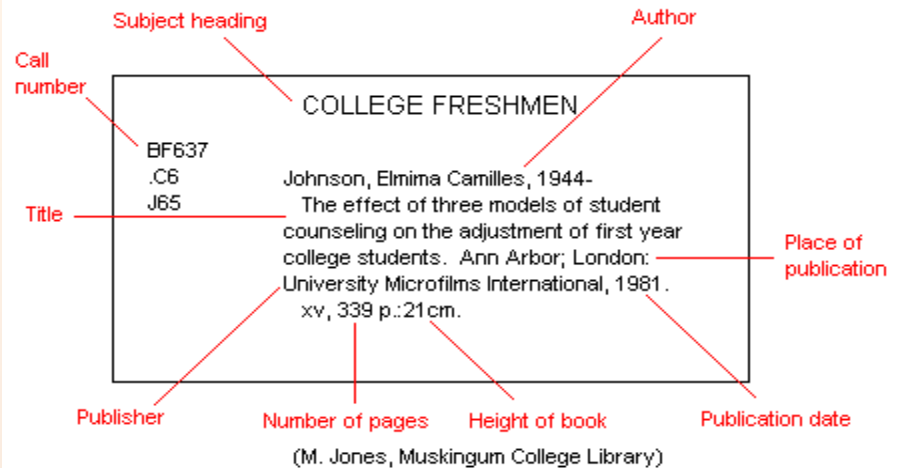

Main differences between AACR2 and RDA

- **RDA tries to be all things to all communities that catalog/create metadata**
- **AACR2 is mainly a descriptive cataloging code, although it also has access rules**

Main differences between AACR2 and RDA

- **AACR2 chapters organized by media, RDA by whether one is cataloging a work, expression, or a manifestation**
