Investing in answers from the past

Anna Osterholtz
President's UNLV Foundation
Graduate Research Fellow

Sifting through human skeletal remains doesn't rattle Anna Osterholtz. The UNLV bioarchaeology fellow is conducting research on Bronze Age bone fragments in Cyprus. She hopes her research will help her understand how culture buffered ancient humans from sickness — and help us learn how we can better adapt to social and biological stress today.

Anna's research is generously supported by the President's UNLV Foundation Graduate Research Fellowship, funded by private gifts to the UNLV Foundation.
