**Center for Women & Information Technology.** Internet Resource. Reviewed in 2007Jan CHOICE.

The Web site of the Center for Women and Information Technology at the University of Maryland, Baltimore County, includes in the Resources section various listings of print and online resources relevant to women's studies. Most notable is Jo Sanders's comprehensive (as of 2005), extensively annotated "Bibliography on Gender and Technology in Education," which contains nearly 700 entries and is searchable. This bibliography, an expansion of a version published as part of a review essay in the *Handbook of Gender and Education* (ed. by Chris Skelton, Becky Francis, and Lisa Smulyan, 2006), is available in PDF and EndNote formats. The Resources section includes a brief list of selected books and journal issues about women and information technology (linked to tables of contents when available), the archives of the Women's Studies Listserv (WMST-L), and annotated lists of recommended Web sites focused on girls' and women's issues. The site also includes Global News, program announcements and initiatives of interest to students, faculty, and professionals, and other information related to the center's academic goals. **Summing Up:** Recommended. Upper-level undergraduates through professionals/practitioners.
