ABSTRACT

Fallow

Fallow follows both line & circle—i.e., the generational evolution (cultural, political, personal) of family farms in the Amurrikan Midwest; & the mandalic forces beneath, above & within. The steady decline & demise of the family farm faced w/ corporate feudalism, signals not only the degradation of a lifestyle, but also the final nullification of Jefferson’s yeoman farmer, upon (& for) whom this country is supposedly founded.

Of course, the depredation of a mere human culture pales vs. the ecological transgressions of modernization: tillage, petrochemicals, ever-bigger machines. Few landscapes outside the Heartland have been so thoroughly stripped of indigenous life, & now, fecundity. Land & labor are expendable from boardrooms where “fields of green” becomes the Amurrikan idiom: sow seed fencerow to fencerow; prosper in this way.

Out goes the floor (as social buttress & metaphor) :: so go prices world over.

Land values soaring & cashgrain prices in decline :: ready the next downswing!

So from this where-we-are

we goes.

Fallow follows both line & circle—i.e., the generational evolution (cultural, political, personal) of family farms in the Amurrikan Midwest; & the mandalic forces beneath, above & within. The steady decline & demise of the small family farm faced with corporate feudalism, signals not only the degradation of a lifestyle, but also the final nullification of Jefferson’s yeoman farmer, upon (and for) whom this country is supposedly founded

:: or what was
before Ham-hands’ big $$ push
(bolder w/ Jefferson in Paris)

:: meatmeatmeat

Writing in 1785 to JM. Madison, Jefferson predicts the approaching possibility of parceling out land to all citizens as incentive, investment in the visceral stuff of the nation: “it is not too soon to provide by every possible means that as few as possible shall be without a little portion of land. The small landowners are the most precious part of a state.” This valuation clearly endorses an autonomous, active polis—plurality’s shared stake in existence—meant to incite engagement, to create & maintain a constant kinesis. Recent annulments make this moot. Farmhouses rapidly boarded over, the fields to larger operations, families into the cities.

Of course, the undermining of a mere human social philosophy or culture pales against the ecological transgressions of modernization: tillage, petrochemicals, ever-bigger machines. Few landscapes outside the Heartland have been so thoroughly stripped of indigenous life, and now, fecundity. Land & labor expendable from boardrooms. “Fields of green” indeed.

However, plumbing the trajectory of ag history throughout this country’s development presents a formidable task—particularly when the goal under-hand is to identify the scoundrel pundit/policy that led to the present decline. As w/ any such case: INCONCLUSIVE

(i.e., a clusterfuck)

Even these “historic times” of “unity” (Geo. Bush Jr.’s wooden rhetorical teeth) find the autonomous small farmer still disenfranchised (word of dubious commodity anymore :: generic victim tag) by ag policy, in spite of a recent comment by an agribusiness economist who, in discussing land value prices, cites decided change from the ups & downs of the 70s & 80s.iii Land value, of course, being tied directly to legislative action, being tied directly to import/export authorities, being therefore & not-quite-finally tied to the military-industrial complex:

FOOD IS A WEAPON
(elected mouth’s other side sez: IS NOT)

Where Fallow begins: a depression (rather, THE, 1930s)—& its strange cohesion—in mutual endeavor, hands helping & tending to own use. An onslaught of itinerant laborers & organizing (“Disarm the rich farmer or arm the worker for self-defense” say the Cotton Pickers striking, 1933): bridge of together-hands, stronger. Henry Wallace & FDR reconfigure the ag policy, ergo the nation’s economy: w/ grain price floors, socialized conservation/preservation efforts, renewed faith in good ground, its people. Emerge from the inconsiderate dust: this New Deal. Many assembled behind Mole burrowing. Wallace, Roosevelt, Roswell Garst: architects of this spire. “We are now your fathers: and you shall not lose by the change.”iv

From this emergence: victory gardens, WWII
(another shell loaded to chamber)

A rejection to follow: harvest cum fallow cum use. Ag Secretary Ezra Taft Benson, in stark contrast to the centralized restructuring of FDR’s New Deal, removed the supporting subsidies upon which farmers learned to rely. Open the market: the credo. Grow more, fencerow to fencerow (in the mouth of capon-in-waiting Earl Butz). & from this: the Green Revolution’s imperialistic profiteering. Export the technology, practice, seeds to developing nations (at a profit) to “aid” growth in these potentially democratic societies (ever-widening chevron, gyring spheres of influence). In theory: perhaps humanitarian; in practice: wholly un-. This disruption of tradition compromised the soils & perennial cultures the movement invaded. Though publicly abandoned early, recognized for its detrments, the Green Revolution covertly continues: Pioneer & ICI & DuPont, each a powerful presence in contemporary Eastern Europe, Asia.
This monied push forced unprepared cultivators of land—domestic & abroad—to become manufacturers, suits, & stockbrokers—nothing for which they were educated. To compete w/ professional money-movers at the Board of Trade who direct the flow of food & funds, as a novice economist w/ a forced hand better employed as sod-laborer, is a Herculean feat; to succeed as such, nearly impossible. Without the subsidies & support of the New Deal—themselves a crippling rod through the ag backbone—the floor (as metaphor & legislation) fell out.

To return to Jefferson, again to Jm. Madison, 4 yrs later
this time’s topic :: debt incurrence & life expectancy
the enameled seeds of living economy

“No generation can contract debts greater than may be paid during the course of it’s [sic] own existence....This principle that the earth belongs to the living and not to the dead is of very extensive application and consequences in every country.”

& yet despite these fair warnings
comes the 1970s push to BORROW BORROW BORROW vs yr paper-worth. “Best move an agribusinessman can make.” Grow more to make more. Fencerow to fencerow to house on house to woe. Land value sd to be climbing (though known to be falling) & the inevitable scramble to buysellbuysell—a mad-dash to commerce & indentured servitude as a labor force working off the recompense of debts. True to form: those who fall make room for those who climb. Yertle the Turtle rules all he sees. No longer “land of living” but dead debts instead.

FROM THE DEPARTMENT OF AGRICULTURE:
a clarion—
GET BIG OR GET OUT
(verbatim)

& for those who founder: new centralized authorities to regulate the “surplus” of grain, enact new subsidies, & shellgame the grain away for small gain—the grower, if lucky, getting just enough to pay on his mortgage, through futures markets & ASCS sealing remunerations. Embargoes & embargoes, intimidation campaigns w/ food as fulcrum. Fair trade indeed. Open market same. New World (Trade) Order.

So goes the floor :: so go the prices. Land values soaring & prices in decline :: ready the next downswing!

So, another farm crisis: this time, smalltown bankers share the burden w/ the farmers. So invested in these communities, many bend as far as physiology & policy allow (others take the gun) out of compassion for the broken-hearted foreclosures, grown men weeping so. Yet, the FDIC maintains the binds around the bankers’ hands: & so closes multiple small branches across the country in order to recoup losses on personal loans for farmland. Enter the hobnail thugs, to pursue the insolvent (whether confirmed or suspected). Many forced into payments, into estate sales, to avoid prosecution; 

vii
from out this: depression, homicide, drug abuse, stringent faith. The desperate communities seeking any convenient peg to hang a hat on:

find together (religion, family, domestic outreach)
find implosion (hate crimes, skirmishes w/ the law & each other)
Dale Burr's multiple homicides, single suicide, December 2, 1985

These conditions certainly resemble those of any gutted culture: victims of unfortunate circumstance relinquished to their own squander & spoil, forgotten, ignored. Farmhouses boarded over // squatter's rights now claimed by meth-head labs & indigents. Community dissolving as a forced urbanization takes hold again in the so-delineated "Western" tradition:

Santayana rolls over & over in his earthbed.

& then of course, from this depredation comes a brain-drain: disillusioned youth educated in-state, migrate in search of prosperity, having lost faith in the good ground, nothing left to anticipate at home. All opportunity funnels away, & the once-thriving communities fall into desertion (goldrush ghost towns).

(& Vilsack, rather than bolster literacy, opportunity, turns
—hand at the back pushing—

Biodiversity Prosperity
ie, machinery, tecknowledgy

from what
this hanging)

Yet already & still: farmers & ag extension specialists are pointing to expanding & expensive technologies as one of the chief financial drains on small farmers. W/out the acreage to support these large-scale investments (Global Positioning & prime yield monitors), many small operations are sieving their funds into the manufactures industry in order to simply compete w/ the primacy & privilege of modern machines & those who employ them.

So, from this where-we-are, conclusions are moot. So, from this where-we-are

we goes.

From an unselectedness: Old Man Coyote, who is. & w/ him, wide water, ducks to ride it.

& w/ privilege of form comes a power, to name. Fiat & mud to mold arms, legs, wings. A root from water’s bottom (ducks, the able heroes dredging, bringing forth) to plant & prosper.

So exists—this plural world new defined, beasts (tags) to run it—& Cirape. Who comes.

‘You’ve done well for this world, brother. But it’s dreadfully boring. Shouldn’t we help them bide their time & populate? procreate?’

‘Go big: put out. Novel!’

& so coitus—Coyote finding favor w/ Cirape’s counsel. Finding favor in lordly voyeurism. God’s mysterious interference & bodied distraction. Peg preferred, for manbeasts of a mind.

‘This is good, but this is it? Let’s see them do somethin else, besides this awkward fucking. Otherwise they’ll overrun this world. A dance, perhaps? Show em how to move & feel—some new preoccupation.’

‘Of course! Give em music too—what they want to hear!’

& so birds discover new throats, humans, hands to drum out what’s heard (received).

‘Give em different tongues & abilities—add enmity. Raise the stakes.’

Transference of fiat & gna—a ledge to sound the echo of. Singing world, into being. & w/ it, so tools & trade, so war—

Cultivators of the earth are the most valuable citizens...the most vigorous, the most independent, the most virtuous, and they are tied to their country, and wedded to its liberty and interests by the most lasting bonds.

I consider the class of artificers as the panders of vice, and the instruments by which the liberties of a country are generally overturned.

‘Grow only as you need’ sd the Great Spirit—so they did. Bins full up enough for long
winter. The herd’s seasoned return.

Until one harvest—of a sudden—they had too much. Personal stores, communal silos
turning loads away—‘she’s had enough’—with rows still stalked & standing.

Animals graze in open fields, in full light, wary of movement. No threat here, only
sounds of funny war: boys break ears off & lob them over dead rows, battlecries, the slain
smiling, kernels sharded around them.

& in firelight lazing, lavish venison, woodsmokt maize, half-consumed:

‘Take a load off, GS. We’re only sharing with the little animals.’
In east-west engine housings, hands become
dirtcaked pistons, nothing beyond

Of course there’s that &
the stars add something, maybe that brook—

Fire snaps a rimshot,
wet wood—
two boys unhid,
but then she's

already turned. Dew-smeared legs, no light but fire & stars.

Unhid, & then there's fog. Snap! Wet wood,

ghosting sparks.
The hills, bare feet around this fire, move:
maybe Bacchus fits better.
