Why should you consider Green Building?
Green buildings offer substantial benefits in terms of energy savings, water efficiency and cost reductions. In addition to conserving resources, green building can help lower the community’s greenhouse gas emissions.

How to apply
Complete all necessary submittal requirements, including the Green Building Program Letter of Intent form (located at www.lasvegasnevada.gov/files/GBPForms.pdf). Upon application of building permit, submit the Green Building Program Letter of Intent to the building permit technician. Make sure to build or retrofit to the program standards.

Who should I contact if I have questions?
If you have questions regarding the city’s Green Building Program, or whether your project qualifies for an incentive, please contact a representative of the Green Building Program at (702) 229-4173.

For more information about the benefits and incentives for Green Building, please visit the Green Building section of the city’s Sustainability Web site at www.lasvegasnevada.gov/sustaininglasvegas/greenbuilding.htm

All incentives are based on the availability of funding and incentives are provided on a first come, first serve basis.
