Executive Summary

- A meeting of stakeholders across Nevada was held to explore the potential for statewide collaboration on litter and dumping issues.
- Website activity for the first three quarters of the year averaged 1,122 hits per month, with an average of 1,927 pages viewed per month.
- The team attended 12 community outreach events resulting in 2,154 direct contacts and 324 new mailing list records.
- The Take Pride in America (TPIA) in Southern Nevada completed a total of 41 volunteer events contributing a total of 10,779 volunteer hours.
- The TPIA team filed a no-cost extension to SNPLMA and received an extension until December 31, 2011.
- The Bureau of Land Management (BLM) and UNLV extended the task agreement until December 31, 2011.

Task 1. Strategic Planning and Project Management.

Collaborative Efforts
In July the team sponsored a meeting of interested stakeholders from throughout the state of Nevada to explore the potential of developing statewide collaboration. To further the dialog and encourage collaboration, the areas identified for potential collaboration (page 15 in the final report) were each made into a blog post and an invitation only site so that meeting participants could continue to comment and further plans to collaborate. By the end of the third quarter of the year no participants from the meeting had commented and only 3 had viewed the blog site. This indicated that there was a lack of sustained interest in statewide collaboration. The SNAP Board received an update on the meeting during their July meeting. At that time they indicated that regional (i.e., southern Nevada) collaboration should be the priority for the team.

Throughout the year the team was an active participant of Keep Las Vegas Beautiful. The team assisted in developing a community survey, hosting a community viewing of a documentary on garbage issues, conducting monthly meetings, and organizing the America Recycles Day event.
Keep Las Vegas Beautiful became an active partner in the Hector’s Helpers program by providing arts and crafts supplies, cameras and snacks for the youth in each program. Hector’s Helpers programs were delivered at the East Las Vegas Community Center and Stupak Community Center, two Boys and Girls Club locations (Andre Agassi and McCabe) and Roy Martin Middle School.

Recycling Efforts
The team served as the state coordinator for America Recycles Day, organized annually by Keep America Beautiful. The team was also an integral part of the Keep Las Vegas Beautiful America Recycles Day event. The event took place at the UNLV homecoming game with volunteers recruited by the team collecting all waste from attendees to the game. One hundred and twenty volunteers provided 440 hours of service. 13,033 pounds of recyclables were collected, with 1,139 pounds of compostables and 11,304 pounds of trash. There was a 56% diversion rate. Per capita, there was .655 pounds per person in recyclables, .057 pounds per person in organic waste and .57 pounds per person in trash. The overall per capita numbers or waste generation per person (all three categories) was 1.28 pounds per person.

GIS Project Planning and Management
This year work continued on developing a GIS database with a mobile feature. Field tests of the mobile forms were conducted and the database was refined further. In the last quarter of the year a sampling plan was developed for the volunteer monitoring program that will provide data for the GIS database. The UNLV GIS specialists created a statistically valid transect sampling plan and went into the field to determine the feasibility of the protocol. The plan utilizes a balanced design procedure which includes open dumping sites, closed dumping sites (i.e., sites that have been cleaned) and sites that do not have a dumping record. Sites that do not have a dumping record have been included to enable land managers to assess whether new dumping areas are being created.

Task 2. Messaging Campaign
Website activity tends to fluctuate depending on the time of year. Website averages for January 1, 2011 through September 31, 2011 (the period for which data was available when this report was submitted) are as follows:

- An average of 1,122 hits per month.
- An average of 1,927 pages viewed per month.
- 12 community outreach events were attended. Staffed by the Public Lands Institute, these events are an opportunity to personally meet and recruit new people to volunteering with Get Outdoors Nevada. Table 1 contains a summary of the contacts made.

**Task 3. Litter and Desert Dumping Clean-ups**

In their efforts, TPIA supported a total of 41 volunteer events, wherein volunteers contributed a total of 10,779 volunteer hours. The following figures illustrate team accomplishments since the inception of the project.

*Figure 1 shows the number of events per quarter since program inception.*
Figure 2 shows the number of volunteers participating in events each quarter since program inception.

Figure 3 shows volunteer hours contributed each quarter since program inception.

Figure 4 shows the value of volunteer hours since program inception in dollars and cents.
Figure 5 shows the number of cubic yards of waste removed from public lands by volunteers.
If each cubic yard of waste removed by the anti-litter team were stacked on top of each other the stack would reach over 47,572 feet high.

Figure 7 compares the volume of trash removed from public lands since program inception to a popular monument. NOTE: Due to the early deadline for this report necessitated by the federal holiday the amounts from the additional roll off space provided by the team are not included.
